Superior Materials

Our Gates are constructed entirely of heavy duty galvanized steel.

Advantages of Heavy duty Galvanized steel include low maintenance, No flaking paint, no corrosion, no rust and high quality finish on every unit. Rivets constructed with aircraft quality 1/4" zinc plated which means that they will not loosen or separate with prolonged use unlike other manufacturers that use aluminum pop rivets.

Wheels are constructed entirely of steel which helps withstand heavy impact and heavy continuous use.

Contact us today to find which solution is right for you.
